# Interpret a Data Visualization

Christos Porikis
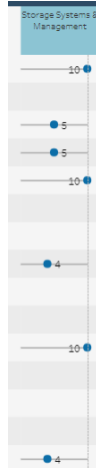

September 2018

1 Insights

1st Insight:Cloud and Distributed Computing is the most demanding skill in 2016 by having rank 1 in all countries(that there is sufficient data), except China where this skill is ranked 4th. From the LinkedIn dashboard,i clicked on Cloud and Distributed Computing,this showed me the rank that this skill has for all the following countries in 2016.

2nd Insight:Storage Systems and Management is the least popular skill with global average rank being 10.As it has the lowest rank,it is obvious that the rank of all the countries is equal or higher than the global average.From the LinkedIn dashboard,i clicked on Storage Systems and Management,this showed me the rank that this skill has for all the following countries in 2016.

3rd Insight:China's demand (rank 4 and rank 3) for the top 2 popular skills is less than the global average (rank 1 and rank 2 accordingly).China's demand,however,for Network and Information Security is ranked 2 which is above the global average(rank 5).From the LinkedIn dashboard,i clicked on China,this showed me the rank that China has for all the following skills in 2016.
